* Many different combinations of household members are possible for these categories. Some representative household survival budget thresholds are shown. Other combinations may be estimated by adding estimated expenses for any additional family members to one of the base household configurations presented in the table, using the following general assumptions:

For each additional

Adult: Add additional \$1,161/month/Adult or \$13,928/year/Adult

Child in Childcare: Add additional \$2,198/month/child or \$26,379/year/child in Childcare

School-age child: Add additional \$1,351/month/child or \$16,214/year/School-age child
